

# 5 STEPS TO ELIMINATE BED BUGS

We have a specialized division created to help battle the resurgence of bed bugs. We are very experienced in the prepping and handling of infested contents. Its parent company (Moving Right Along Service Inc.) has been relocating families and offices for over 30 years. We are more than capable to remove and safeguard your possessions while they are being treated. We are licensed and insured and provide a fast, reliable, friendly service. Our movers recognize the anxiety and psychological stress that you endure while dealing with a bed bug dilemma. No matter what the severity of your infestation, we provide a partial or full removal of your items for the fumigator to treat. Our company, along with your Pest Control Operator and Fumigator, will give you the reassurance that you will be able to sleep tight knowing that the bed bugs won't bite.

## HERE IS HOW IT'S DONE:

1. The Pest Control Operator advises the client as to what should be removed from the premises.
2. Our team suits up and wraps everything to ensure that bed bugs cannot escape when the contents are loaded into a fumigation chamber and transported to our fumigation center.
3. The 3rd party fumigator is arranged to fumigate the entire chamber to ensure a 100% kill rate. The fumigant used is colorless, odorless, and tasteless and leaves absolutely no residue.
4. The Pest Control Operator treats the premises while the contents are quarantined.
5. BED BUG FREE contents are returned to the premises or placed into our storage facility for future delivery.

**DON'T LET THE BED BUGS BITE**
